

## Circle Shape Activity Worksheet

In the row below, find all the circles. Color the biggest one red and the smallest one yellow.

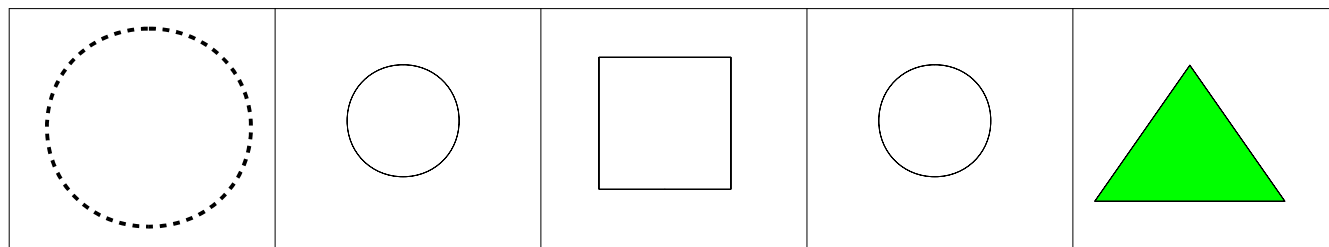

Point to the one that looks most like a circle. Do you know what shape it is? What color is it?

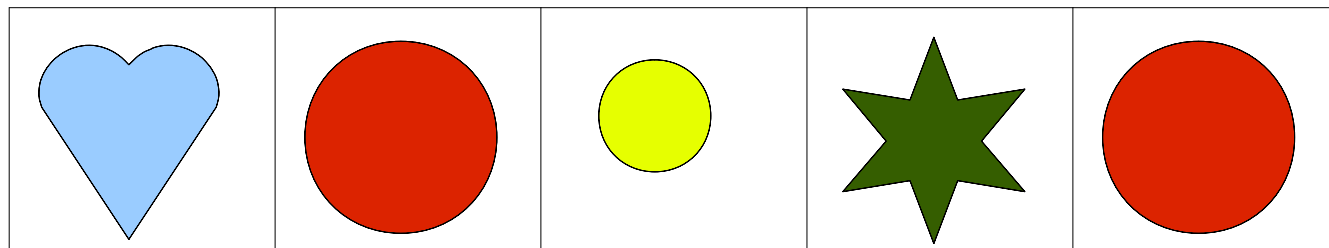

In the row below, point to all the circles. What color is the biggest one? How many small circles can you count? Color these green. What other shapes do you see? What color is it?

In the row below, color all the circles orange. Color the square red. Trace the largest circle. Count the small circles. What other shape do you see? What color is it?

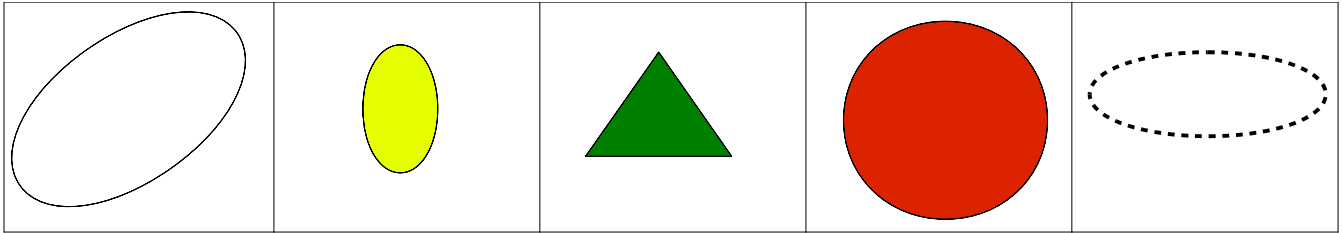

In the row below, find all the circles. How many red circles can you count? What color is the smallest? What color is the heart shape? What shape is the green object?

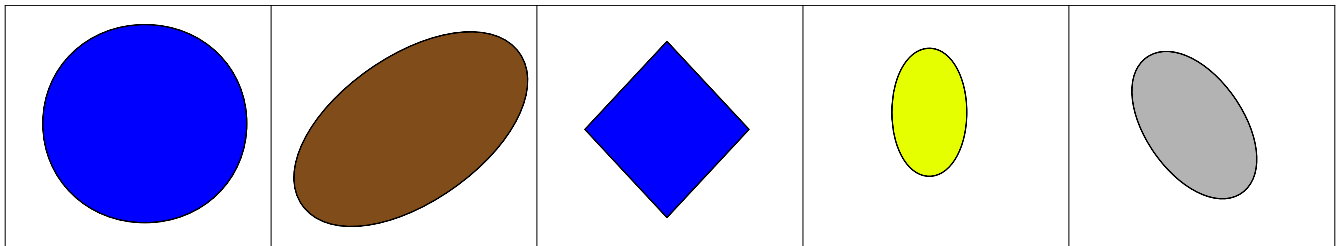

## Oval Shape Activity

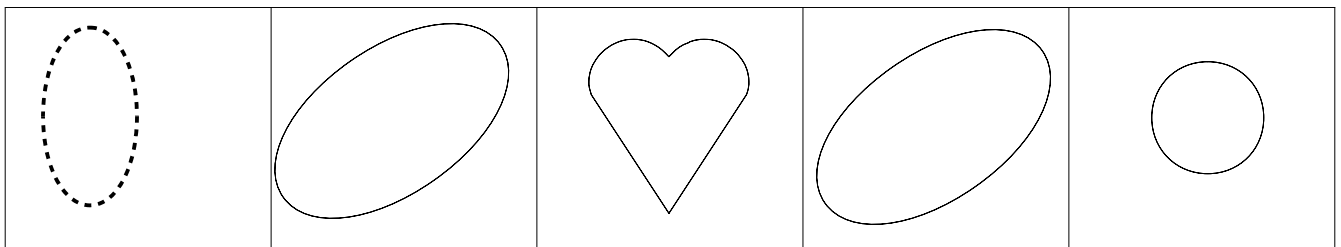

In the row below, find all the ovals. What color is the smallest one? Color the biggest oval green. Trace the last oval and color it orange. Point to the one that looks most like an oval. Do you know what shape it is? What color is the circle? What other shape do you see. How many ovals can you count?

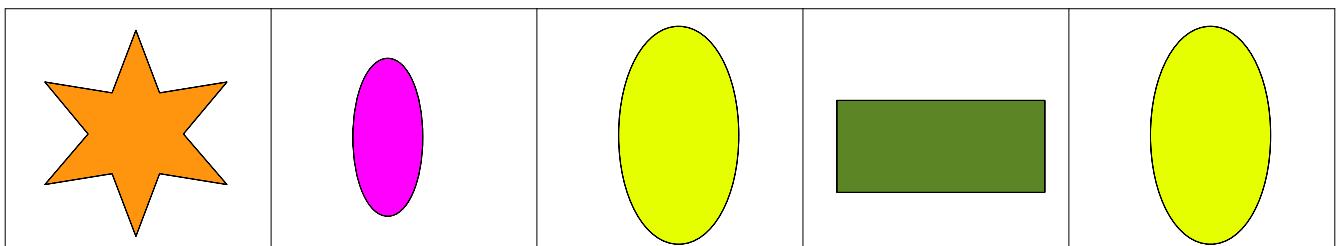

In the row below, count the ovals. What color is the biggest one? How many small circles can you count? Color these green. What other shapes do you see? What color are they?

In the row below, color all the ovals pink. Color the heart red. Trace the smallest oval. Count the large ovals. Do you see any other shapes?

In the row below, find all the ovals. How many yellow ovals can you count? What color is the smallest? What color is the star shape? What shape is the green object?

## Square Shape Activity Worksheet

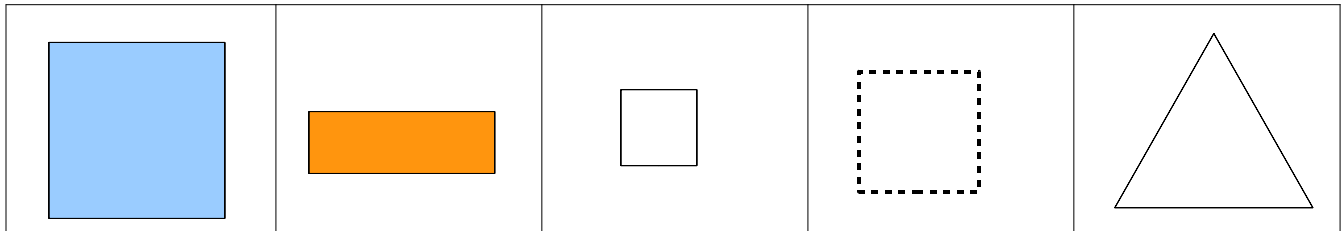

In the row below, find all the squares.

What color is the biggest square? Color the smallest square orange.

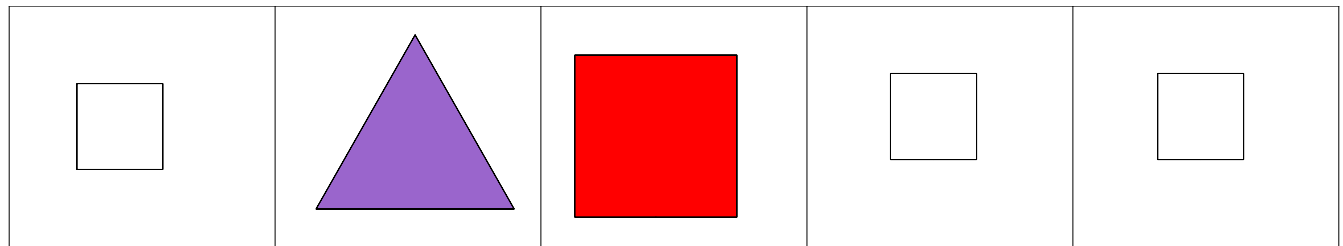

Trace the medium square and color it green. Point to the one that looks most like a square.

Do you know what shape it is? What color is this other shape?

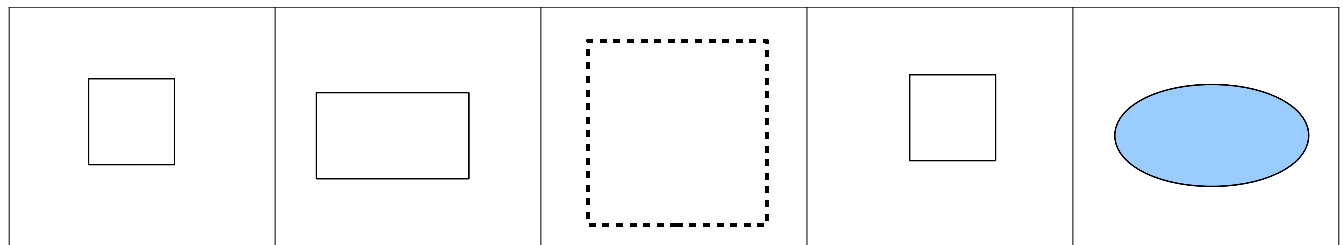

What other shape do you see. Color this shape red.

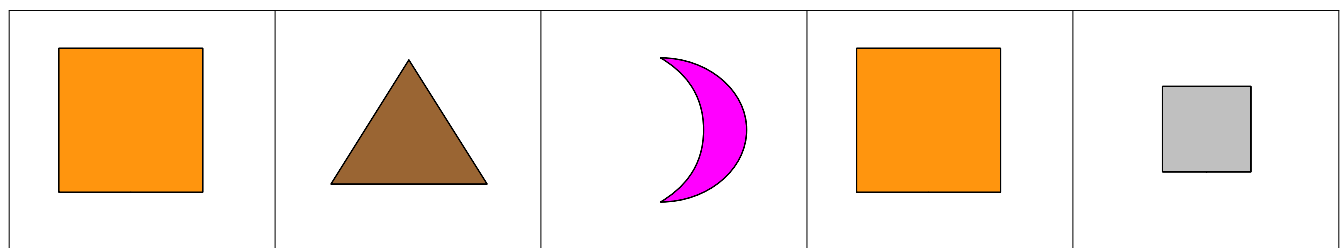

In the row below, point to all the squares. What color is the biggest one? How many small squares can you count? Color these blue. What other shapes do you see? What color is it?

In the row below, color all the squares yellow. Color the rectangle red. Trace the largest square. Count the small squares. Do you see any other shapes? What shape is this? What color is this other shape?

In the row below, find all the squares. How many orange squares can you count? What color is the smallest? What color is the triangle shape? What shape is the pink object?

## Rectangle Shape Activity Worksheet

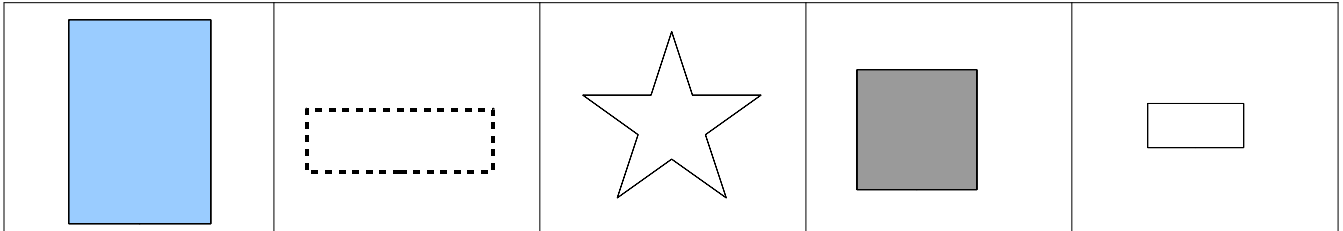

In the row below, find all the rectangles.

What color is the biggest rectangle? Color the smallest rectangle purple.

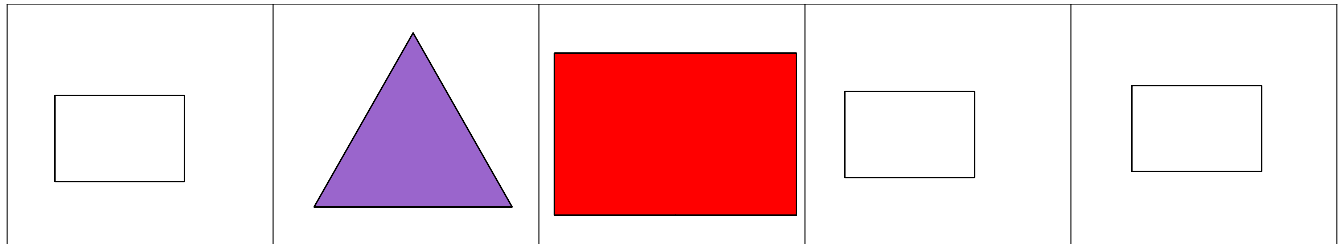

Trace the medium rectangle and color it brown. Point to the one that looks most like a rectangle.

Do you know what shape it is? What color is this other shape?

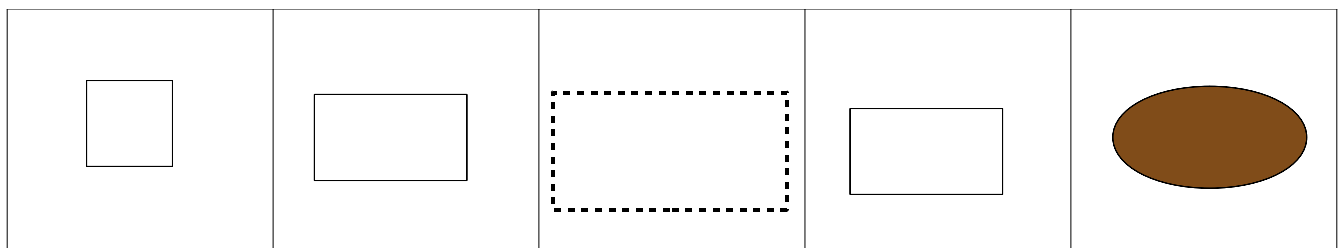

What other shape do you see. Color this shape red.

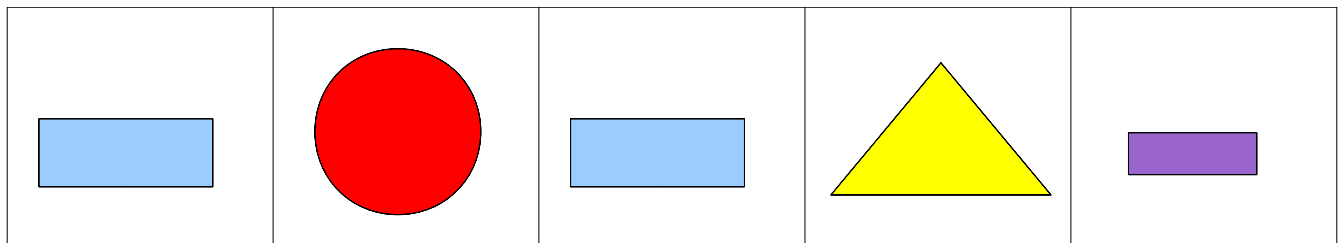

In the row below, point to all the rectangles. What color is the biggest one? How many small rectangles can you count? Color these green. What other shapes do you see? What color is it?

In the row below, color all the small rectangles yellow. Color the square orange. Trace the largest rectangle and color it blue. Count the small rectangles. Do you see any other shapes? What shape is this? What color is this other shape?

In the row below, find all the rectangles. How many blue rectangles can you count? What color is the smallest? What color is the circle shape? What shape is the yellow object?

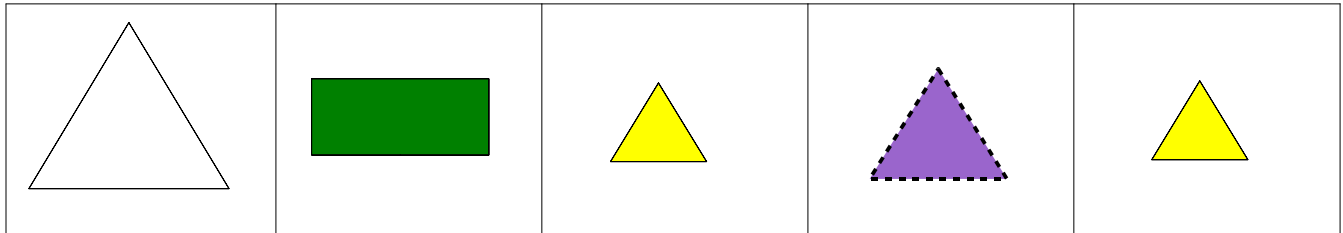

## Triangle Shape Activity

In the row below, find all the triangles. Color the biggest one pink.

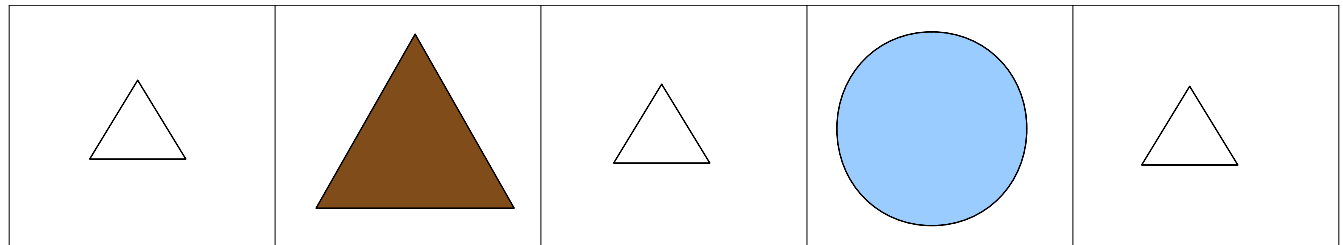

Count the small triangles. What color are they?

Trace the medium triangle. What color is the medium triangle?

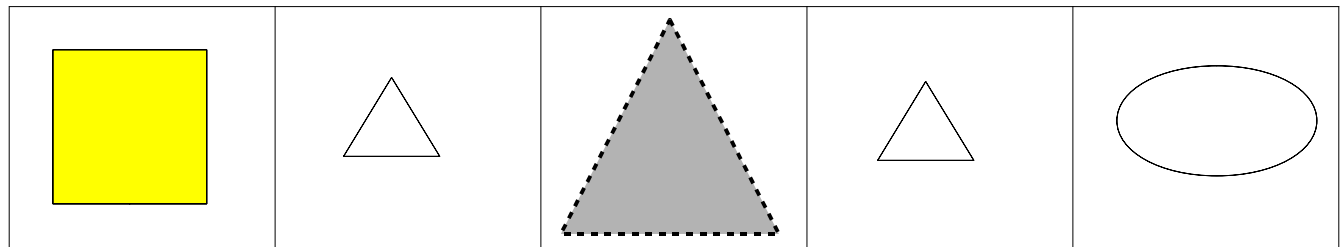

Do you see any other shapes? What shape is it? What color is this shape?

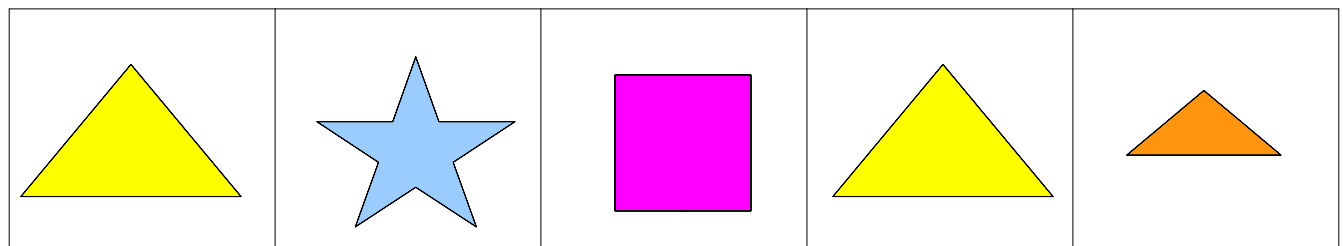

In the row below, point to all the triangles. What color is the biggest one? How many small triangles can you count? Color these orange. What other shapes do you see? What color is it?

In the row below, color all the small triangles green. Color the oval blue. Trace the largest triangle. What color is the big triangle? Count the small triangles. What color is the square?

In the row below, find all the triangles. How many yellow triangles can you count? What color is the smallest? What color is the star shape? What shape is the pink object?

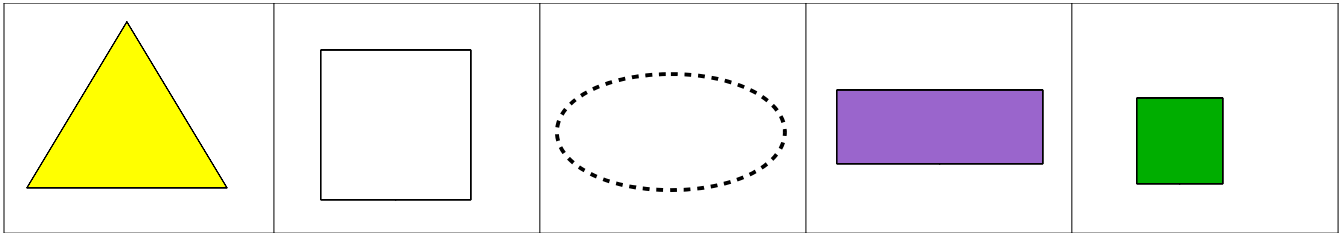

## All Basic Shapes Activity Worksheet

In the row below, how many triangles do you see? What color is it?

How many squares do you see? Color the biggest square blue. What color is the small square?

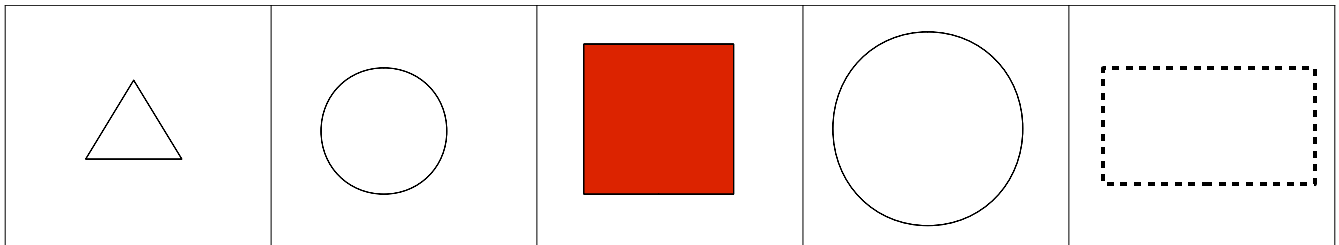

Trace the oval shape and color it orange. What other shape do you see? What color is it?

In the row below, point to all the circles. How many are there? Color the biggest green.

How many triangles can you count? Color this blue.

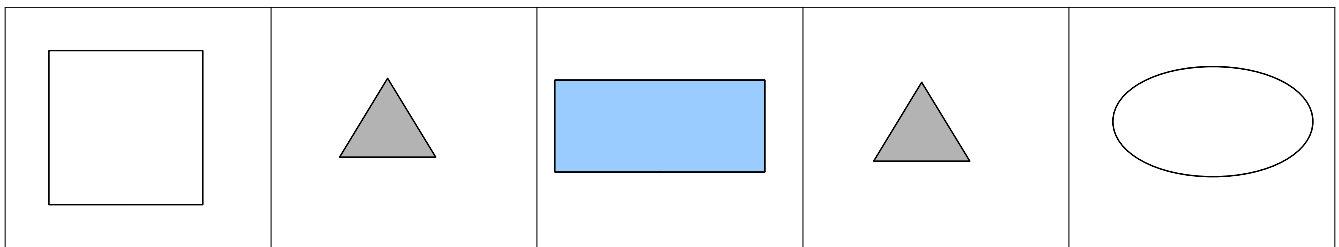

Trace the rectangle and color it yellow. What other shape can you see? What color is it?

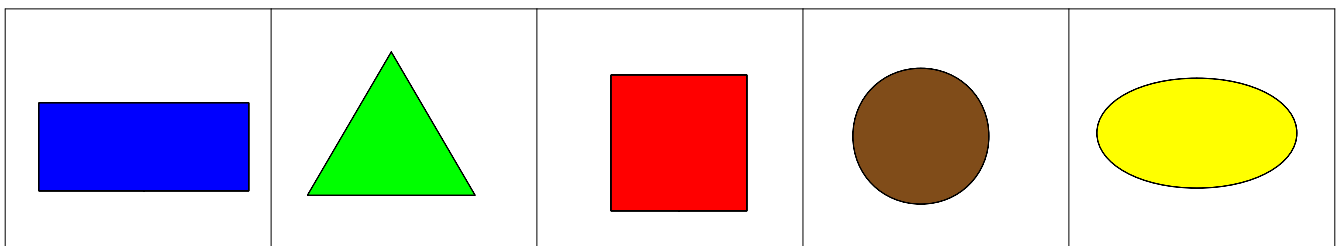

In the row below, color the oval purple. Find the square and color it red.

How many triangles do you see? What color are they?

What color is the rectangle? Can you find any circles?

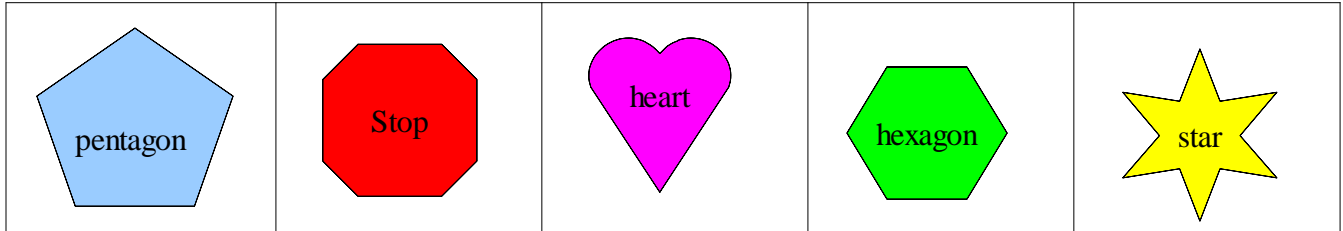

In the row below, name each shape and the color of each shape.

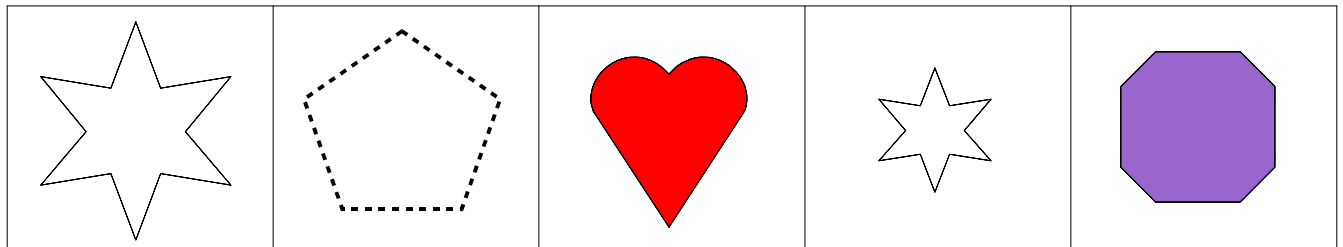

## Bonus Shapes Activity Worksheet

In the row below which shape looks like a house? Do you know the name of this shape?  
What color is the octagon? What common object has this shape?  
What shape is often used to mean love? What color is the heart?  
How many sides can you count on the hexagon? What color is it?  
What shape do you often see in the sky at night?

In the row below, point to all the stars. Color the biggest star blue. Color the smallest star pink.  
Trace the pentagon and color it brown. What color is the octagon (the shape with 8 sides).  
What other shape do you see? What color is it?

In the row below, find the shape with 6 sides. What is the name of this shape? What color is it?  
Find the heart and trace it. Color it blue.  
Count the number of pentagons (house shape). How many are there?  
Color the biggest pentagon green. Color the smallest pentagon yellow.  
What color is the star?
